Please find below and/or attached an Office communication concerning this application or proceeding.

AK

<b>Office Action Summary</b>	<b>Application No.</b> 10/764,599	<b>Applicant(s)</b> HOSHIYAMA ET AL.	
	<b>Examiner</b> Jason Uhlenhake	<b>Art Unit</b> 2853	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1,2,3,7,8,9,10,11,12, and 13 are rejected under 35 U.S.C. 102(a) as being anticipated by Valero (U.S. Pub. 2003/0081038).

#### ***Valero discloses:***

- ***regarding claim 1***, method for ejecting liquid with steps of forming an adjustment pattern in a predetermined position on a medium (30) by ejecting said liquid onto said medium (Paragraphs 0009 – 0012); determining whether or not to form said adjustment pattern again (Figure 5, Paragraph 0055); and if it is determined that said adjustment pattern is to be formed again, then forming said adjustment pattern again in a position that differs from said predetermined position by ejecting liquid onto said medium (30) (Paragraph 0012, Figure 1 – 402,404,406,408)
- ***regarding claim 2***, if additional adjustment pattern is to be formed on said medium (30) after forming said adjustment pattern again, then said additional adjustment pattern is formed in a position that differs from both the position in which said adjustment pattern has been formed earlier and the position in which said adjustment pattern has been formed again (Paragraph 0012, Figure 1 – 402,404,406,408)

- **regarding claim 3**, adjustment pattern is formed in a plurality of locations on said medium; and adjustment patterns are formed again in correspondence with each of the adjustment patterns that have been formed earlier in said plurality of locations (Paragraph 0012, Figure 1 – 402,404,406,408)
- **regarding claim 7**, adjustment pattern formed earlier and said adjustment pattern formed again are formed by an ejection head that is for ejecting liquid while moving relatively with respect to said medium (30) (Paragraph 00009); said adjustment pattern that has been formed earlier and said adjustment pattern that has been formed again are patterns for adjusting a misalignment between a position on said medium (30) where said liquid reaches when said ejection head moves in one direction, and a position on said medium (30) where said liquid reaches when said ejection head moves in another direction (Paragraph 0042)
- **regarding claim 8**, adjustment pattern that has been formed earlier and said adjustment pattern that has been formed again are patterns for adjusting a carry amount for which said medium is carried (Paragraphs 0036-0038, 0044)
- **regarding claim 9**, setting the position in which said adjustment pattern is to be formed again (Figure 5, Paragraph 0056)
- **regarding claim 10**, wherein said liquid is ink (Paragraph 0009); and said adjustment pattern formed earlier and said adjustment pattern formed again are printed by ejecting said ink onto said medium (30) (Paragraphs 0009 - 0010)
- **regarding claim 11**, a liquid ejecting apparatus for ejecting liquid onto a medium (Figure 4, 408, 410, 412, 414), wherein said liquid ejecting apparatus is capable of

forming and adjustment pattern in a predetermined position on said medium (30) with said liquid ejection section (Paragraphs 0009 – 0012), wherein after forming said adjustment pattern, said liquid ejection apparatus determines whether or not to form said adjustment pattern again; and wherein (Figure 5, Paragraph 0055), if it is determined that said adjustment pattern is to be formed again, then said liquid ejection apparatus forms said adjustment pattern again in a position that differs from said predetermined position by ejecting liquid onto said medium (30) (Paragraph 0012)

- **regarding claim 12**, a computer-readable storage medium having a computer program for controlling a liquid ejecting apparatus capable of ejecting liquid onto a medium (30) (Paragraph 0055), with said program causing said liquid ejecting apparatus to execute the steps of; forming and adjustment pattern in a predetermined position on said medium (30) by ejecting liquid onto said medium (30) (Figure 5); if determined that said adjustment pattern is to be formed again, then forming said adjustment pattern again in a position that differs from said predetermined position by ejecting liquid onto said medium (30) (Paragraph 0055, Figure 5; Paragraph 0012, Figure 1 – 402,404,406,408)

- **regarding claim 13**, computer system comprising, a computer; and a liquid ejecting apparatus (Figure 4, 408, 410, 412, 414) that is connected to said computer such that said liquid ejecting apparatus can establish wired or wireless communication with said computer (Paragraphs 0050, 0055); wherein said liquid ejecting apparatus is capable of forming an adjustment pattern in a predetermined

position on a medium (30) by ejecting liquid onto said medium (30) medium (Paragraphs 0009 – 0012); wherein after forming said adjustment pattern, said liquid ejecting apparatus determines whether or not to form said adjustment pattern again; and if it is determine that said adjustment pattern is to be formed again, then said liquid ejecting apparatus forms said adjustment pattern again in a position that differs from said predetermined position by ejecting liquid onto said medium (30) (Paragraph 0055, Figure 5; Paragraph 0012, Figure 1 – 402,404,406,408)

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Valero (U.S. Pub. 2003/0081038) in view of Williams (U.S. Pat. 6,14,749).

***Valero discloses all of the claimed limitations except for the following:***

- regarding claim 4, at least either one of said adjustment pattern formed earlier on said medium or said adjustment pattern formed again on said medium is marked in the vicinity thereof with a character for specifying that it is the adjustment pattern formed earlier or a character for specifying that it is the adjustment pattern formed again.

***Williams discloses the following:***

- regarding claim 4, at least either one of said adjustment pattern formed earlier on said medium or said adjustment pattern formed again on said medium is marked in the vicinity thereof with a character for specifying that it is the adjustment pattern formed earlier or a character for specifying that it is the adjustment pattern formed again (Column 2, Lines 18 – 44).

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to incorporate the teaching of regarding claim 4, at least either one of said adjustment pattern formed earlier on said medium or said adjustment pattern formed again on said medium is marked in the vicinity thereof with a character for specifying that it is the adjustment pattern formed earlier or a character for specifying that it is the adjustment pattern formed again as taught by Williams into the device of Valero. The motivation for doing so would have been allow adjustment patterns to be readily visible to the operator.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Valero (U.S. Pub. 2003/0081038) in view of Butterfield (U.S. Pat. 6,685,297).

***Valero discloses all of the claimed limitations except for the following:***

- regarding claim 5, said adjustment pattern that is formed again is formed side by side with said adjustment pattern that has been formed earlier.

***Butterfield discloses the following:***

Art Unit: 2853

- regarding claim 5, said adjustment pattern that is formed again is formed side by side with said adjustment pattern that has been formed earlier (Figure 2; Column 3, Lines 47 – 50)

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to incorporate the teaching of said adjustment pattern that is formed again is formed side by side with said adjustment pattern that has been formed earlier as taught by Butterfield into the device of Valero. The motivation for doing so would have been to create a test print for use in aligning one or more print heads in a print head unit.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Valero (U.S. Pub. 2003/0081038) in view of Valero (U.S. Pat. 6,802,580).

***Valero discloses all of the claimed limitations except for the following:***

- regarding claim 6, said adjustment pattern that is formed again is formed diagonally adjacent of said adjustment pattern that has been formed earlier.

***Valero (U.S. Pat. 6,802,580) discloses the following:***

- regarding claim 6, said adjustment pattern that is formed again is formed diagonally adjacent of said adjustment pattern that has been formed earlier (Figure 4; Column 7, Lines 12 – 19)

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to incorporate the teaching of said adjustment pattern that is formed again is formed diagonally adjacent of said adjustment pattern that has been

formed earlier as taught by Valero (U.S. Pat. 6,802,580) into the device of Valero. The motivation for doing so would have been to be able to distinguish the dots or lines printed by one nozzle from those printed by another nozzle.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Uhlenhake whose telephone number is (571) 272-5916. The examiner can normally be reached on Monday - Friday 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
